# Mines and Mining Stocks | Financial and Commercial

of the properties of the Utah Copper company. Formal announcement of the fact was made by General Manager D. (Mexican currency) gold and silver. The property embraces also probably C. Jackling yesterday. Mr. Gemmel is as many as 150 other shallow mines or openings, which have been worked in deal of work for John Hays Hammond, the Utah Copper company's chief en-Pachuca is essentially a silver-g gineer, and also for the late Victor M. camp, Clement. He went from here a few been years ago to take charge of the Clement properties in Mexico, and he remained

Mr. Gemmel was looking after things was slated for some important post. scale, involving an expenditure of about \$1,000,000 gold. ling yesterday removes all doubt.

Another important bit of information

While Manager Jackling did not say can methods of treatment. so, the presumption is that the company has decided not to trust to the chance of getting power from the corporation that has been promising to bring it in from the Snake river in Idaho, a company which, a few months since, was understood to have secured contracts

Within the next month Manager Jackling hopes to see all contracts for material and equipment for the new mill and power plant awarded. Much structural material has already been ordered and, by the time machinery can be landed here the buildings will be in shape to permit its installation. There will be no holding back till the plans of the company have been fully carried through.

GOING AFTER THE GOLD.

erty in Thayne's canyon. According to the message, the strike, which is in the face of the tunnel 400 feet in, develops solid ore in a bedded vein seven feet across.

Two holes put in the bottom of the tunnel late yesterday, but not fired, showed or as far as the drills went. Assays of average samples down the face of the vin showed 7½ ounces silver and 10 per cent copper, and while the men interested are inclined to be conservative and say the ore would probably need sorting to ship, still it is regarded as good enough to feel elated over.

The appearance of the ore in quantity Within the next month Manager

Mining company. This company has ments in that direction ecured valuable gold properties near the famous Searchlight district in Nevada, and have already commenced development on the claims. During J. Parke Channing Is Now Examining the past few weeks 50,000 shares of the treasury stock have been sold to local railroad men and their intimate friends

turned from the claims bringing with them specimens of rock taken at random from a six-foot vein which are expected to run at least \$25 in gold to the ton. Assays made frequently in the past show an encouraging presence the ton. Assays made frequently in the past show an encouraging presence of free gold in rock taken at a depth of a few feet below the surface. A thirteen-foot shaft has been sunk, revealof free gold in rock taken at a depth of a few feet below the surface. A thirteen-foot shaft has been sunk, revealing seams of tale which, under microscopic examination, show the presence of free gold, but no assays of this rock have yet been made to determine its have made an excellent showing.

If the options are taken up, a main ments going on at mines Nos. I and 5 a similar to that of the Montgomery- erty. Shoshone at Bullfrog.

With few exceptions the members and officers of the new mining company are local railroad men. Others who are interested heavily in the proj. John Morehouse Returns From Visit Adams Con. .. \$.30 [Little Chief ... .071/2] tan, 12 tons. are Judge J. W. Burton and Judge W. H. King of Salt Lake, and J. A. Bagley of Idaho. Articles of incorporation were filed in this city two weeks man and father of Frank Morehouse ago, and up to yesterday the entire general manager of the Mexico Conaffair was kept a secret. Now that the solidated company's mines and mills in necessary amount of treasury stock has been sold and development com-

## MINING STOCK EXCHANGE.

## Market Gives Unmistakable Signs of Growing Strength.

Growing Strength.

While heavier trading has been indulged in quite frequently of late, there has not been a day since the first of the year when the local mining share market exhibited a stronger undertone than it did yesterday. Brokers from all sides of the pit were striving hard to execute orders, and that a greater volume of business was not done was due largely to the apparent fact that buying orders were about the value of the property; said worried over the question as to whethwhen the property is equipped we want to feel certain that we have installed the best method. We are sending ore to Denver for testing purposes and we may have tests made elsewhere.

Growing Strength.

## READING FEATURE OF DAY

some wavering during the first hour of trading which carried the level below last night for a brief time. The later action of the market, however, demonstrated that this selling was mostly for bear accounts in an effort to renew the decline. The demand to cover short sales then helped the general strength of the later market. The advances were yielded abruptly before the close on the 8 per cent call loan rate. There were some outstanding short accounts to be covered which were of longer standing and probably represented more substantial speculative sentiment. Such short covering was very obvious in Reading. This stock was the feature of the day, and its furious activity caused the enormous blocks absorbed upon the advance overshadowed the whole market. In spite of this congestion of activity in Reading and to a less extent in a few other prominent stocks, the volume of the dealings contracted considerably. The yielding tendency of the market during the first hour, in which Reading shared, was due in a large part to the deductions drawn by speculative operators from the decision of the supreme court against the in a large part to the deductions drawn by speculative operators from the decision of the supreme court against the Chesapeake & Ohio in the matter of transportation charges for coal sold for its own account. It was inferred that the present status of the anthracite companies would bring them within the scope of the decision with far-reaching effect on the business of the combined anthracite companies. This opinion was modified upon closer study of the decision by the court, and clauses were found even to be interpreted as giving legal sanction to the present conditions of operating in the anthracite trade. The vigorous recovery in Reading owed something to this consideration. With the relaxation of pressure to liquidate demonstrated there was some natural turn among professionthe con. ## GRAIN AND PROVISIONS.

Chicago. Feb. 20.—The wheat market was weak from the opening. The initial quotations showed May down 16% to 23%, 282% and before the end of the first hour the price had dropped to 81%. The principal cause of the decline was the French crop report, which showed that 16,081,000 acres had been seeded to wheat, against 15,632,000 acres last year. The failure of the Liverpool market to respond to the advance yesterday here and the continued mild weather in the United States both contributed to the weakness. As trading progressed additional news of a bearish character was received, chief of which was a report from India that additional rain had fallen in several provinces. Around 82 cents for May there seemed to be an almost unlimited number of buying orders. Some of these were the result of damage reports from Missouri, but the larger part was in the nature of covering by shorts. Prices rallied somewhat late in the day, but the close was weak, with May off 5,03% at \$23%,082%. Adams Ex. .... 240 Amal. Coppper .. 91,900 112% 110% 1111% Wet weather in the middle west caused

Wet weather in the middle west caused a steady corn market during the first hour. Later on persistene seiling and the weakness in wheat the market dropped, May closing \( \frac{1}{2}\text{\text{\$\sigma}}\) (4c off at 29\frac{3}{4}\). Provisions were weak on prift-taking by local longs, and the decline in the grain market. Lard and ribs showed less weakness than pork because of active buying by packers. At the close May tork was down 17\text{\text{\$\text{\$\sigma}}\} (1ard was off 7\text{\text{\$\sigma}}\) (20\text{\$\text{\$\sigma}}\) (10\text{\$\text{\$\text{\$\sigma}}\}) (10\text{\$\text{\$\sigma}}\) (10\text{\$\text{\$\text{\$\sigma}}\}) (10\text{\$\text{\$\sigma}}\) (10\text{\$\text{\$\sigma}}\) (10\text{\$\text{\$\text{\$\sigma}}\}) (10\text{\$\text{\$\sigma}}\) (
